

Paygo

\$129 USD /month

Pay per active job

PRORATED CHARGE

For jobs created in the **middle of the billing cycle**, there will be a prorated charge based on the time the job is active until the next billing date.

TIP

Set a reminder to archive your job at least one day before your next billing cycle to prevent being charged.

Check your next billing date in [your Plan settings](#).

You will be charged as long as the job is active.

What counts as active?

Job status of Published, Used Internally, Used Confidentially

Published ▼

Used Internally ▼

Used Confidentially ▼

How to stop being charged?

Change job status to [archived](#). This is the only way! Unarchiving a job will add it back to the billing cycle.

Add premium tools per job to your PAYGO plan.*
